

Adventure Works Human Resource Report

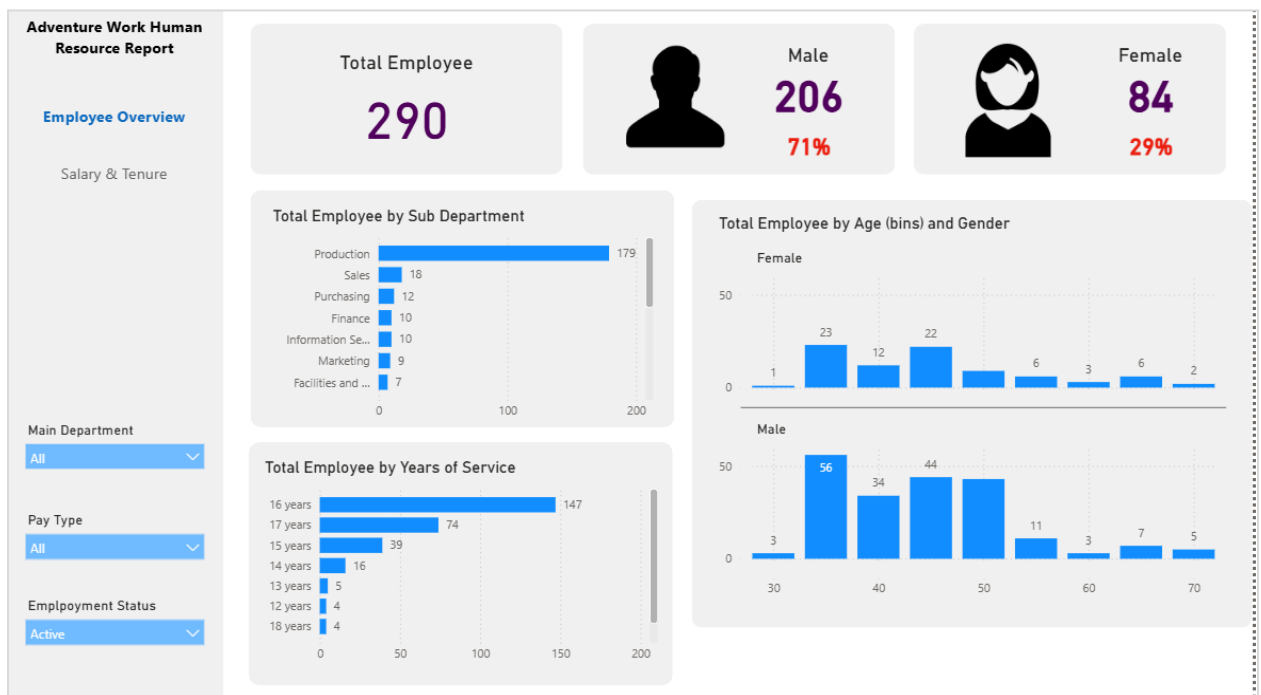

1. Project Overview

An interactive Power BI dashboard designed to provide an overview of employee demographics, workforce distribution, salary and tenure. This report allows users to explore employee information by department, gender, employment status and other workforce characteristics

2. Objective

To analyze employee demographics, salary distribution, tenure, organizational level and workforce composition using Power BI.

3. Dashboard 1(Employee Overview)

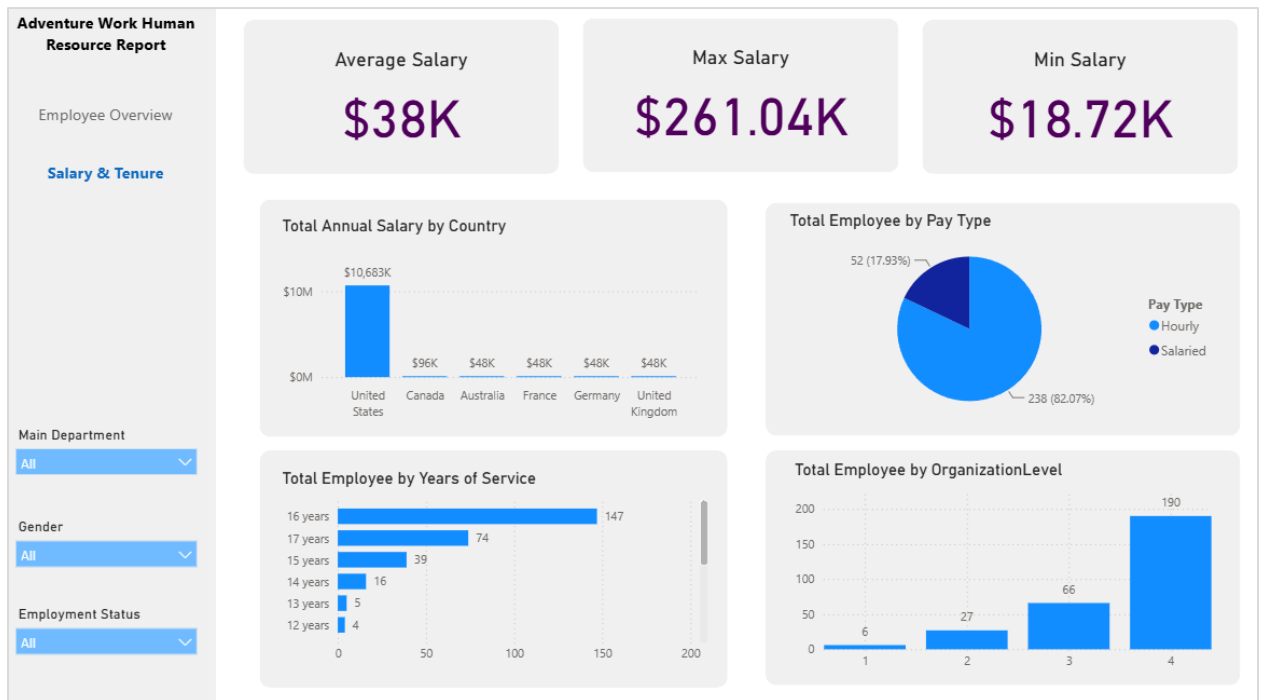

This dashboard provides an overview of the company's workforce including total employees, gender distribution, years of service and employee age by gender. Interactive filters allow the workforce to be examined by main department, pay type and employment status.

Key Observations

- The dataset contains 290 employees, with males representing 71% and female representing 29% of the workforce.
- Production has the largest number of employees among the displayed sub-departments.
- Employee with 16 years of services represent the largest tenure group.
- The age distribution shows that the workforce is concentrated primarily among employees in their 30s to 50s.

4. Dashboard 2(Salary & Tenure)

This dashboard examines employee compensation and tenure across different dimensions including average salary, salary range, country, pay type, years of service and organizational level.

Key Observations

- The average employee salary is approximately \$38K.

- The United States account for the largest total annual salary expenditure among the countries shown.
- The majority of employees are paid hourly, representing approximately 82% of the workforce.
- Most employees are at Organizational Level 4.

5. Tools & Skills

Tools: Power BI, DAX, Power Query

Skills demonstrated:

- Data cleaning and transformation
- Data visualization
- DAX measures
- Interactive filtering
- KPI development
- Workforce analysis

DAX measures created: Total Employees, Male Employees, Female Employees, Male %, Female %, Average Salary, Minimum Salary and Maximum Salary
